EXPERIENCE

Backend Security Intern

June 2025 – Present

Abluva Pvt Ltd, Pune (Remote)

- Worked on the backend system of a database proxy, handling request flow between clients and databases.
- Debugged production issues involving packet handling, access paths, and query parsing in a large Go codebase.
- Built a strong foundation in system-level backend engineering by applying structured debugging, code reading, and clear communication in a remote production environment.

PROJECT

Invoice Billing System

[view project](#)

Tech Stack: ReactJS, Tailwind CSS, NodeJS, Express, MongoDB

- Solved billing errors and invoice number conflicts for a real retail shop handling mixed GST and non-GST sales.
- Designed and implemented backend logic based on actual shop billing workflows, including shop configuration, invoice prefixes, and bill edits/cancellations.
- Improved billing accuracy and data consistency by enforcing validation and unified invoice handling.
